

Session Summary

Mentor: Ahmad Mousa

Date: 2025-04-02 Time: 21:47:00

Key Points:

Key Points Discussed:

Introduction to Artificial Intelligence and its main branches (Machine Learning, Deep Learning, NLP).

Discussed real-world applications of AI in healthcare, finance, and education.

Compared supervised and unsupervised learning with practical examples.

Highlighted the importance of data quality in building accurate AI models.

â€¦ Action Items for Mentee:

Explore Python libraries for AI: TensorFlow, PyTorch, and Scikit-learn.

Read about "Ethics in AI" and prepare a short reflection for the next session.

Try building a simple ML model (linear regression) as a hands-on exercise.

â€• Mentor's Feedback:

"You have a strong curiosity about AI concepts. Focus on practical exercises alongside theory to build solid skills."
